Education

Swami Keshvanand Institute of Technology, Management & Gramothan — *2023 · Present*
B.Tech, Computer Science | CGPA: 9.52 — *Jaipur, India*

Shriram Bal Niketan Sr. Sec. School — *2022 · 2023*
Class XII | 82.00% — *Kota, India*

Aklank Sr. Sec. School — *2020 · 2021*
Class X | 96.00% — *Kota, India*

Professional Summary

B.Tech CS student specializing in ML, NLP, and Deep Learning · designing end-to-end AI data pipelines from research-grade content detection to real-world multilingual fraud prevention. Experienced in model training, hyperparameter tuning, cross-validation, and REST API development. Contributing to open-source AI projects via GirlScript Summer of Code (GSSoC). Passionate about applied AI research and responsible AI development.

Projects

Aethor · AI-Based Content Detection System — *2025*
Python, ML, NLP | Research Paper Project

- Built a text classification pipeline distinguishing AI-generated from human-written content using linguistic fingerprinting and forensic feature analysis · achieving 95% accuracy after cross-validation and hyperparameter tuning across Naive Bayes, SVM, and Transformer-based models.
- Designed end-to-end data pipeline covering preprocessing, feature extraction, model training, and evaluation; extended into a research paper with ablation studies and cross-domain analysis.

SurakshaVaani · Hinglish Fraud Call Detection App — *Ongoing*
Python, ML, NLP, WhisperFlow, FastAPI | Mobile Application

- Building a real-time app detecting fraudulent calls (OTP phishing, police impersonation, money-transfer scams) uniquely targeting Hinglish · a critical language gap unaddressed by existing tools.
- Engineered a data pipeline from live audio capture via WhisperFlow through transcription, sentiment and semantic ML inference, exposed via REST API (FastAPI); dataset balanced using SMOTETomek across Kaggle, HuggingFace, and custom Hinglish sources.

Affective State Inference System — *Ongoing*
Python, Deep Learning, Multimodal Analysis

- Developing a multimodal system accepting text, video, image, and file inputs · dedicated ML/DL models per modality with cross-validated unified evaluation matrix for emotion-state prediction and uncertainty modeling.

Internships

Celebal Technologies — *May 2026 · Present*
Data Science Intern — *India*

- Completing structured training across Python, Classical ML, Deep Learning, RNNs, GANs, RAG, LLMs, and Agentic AI as part of an 8-week applied Data Science program.

PlayTown Studios — *June 2025 · July 2025*
Machine Learning Intern — *India*

- **Ad-Click Prediction System:** Built an ML pipeline on the Criteo Display Ads Dataset predicting click-through likelihood using user behaviour features; performed feature engineering, hyperparameter tuning, cross-validation, and model benchmarking end-to-end.

KisTechnoSoftware — *July 2024 · August 2024*
Frontend Intern — *Jaipur, India*

- **City Creatives:** Built and version-controlled responsive web pages using HTML and CSS · implemented structured layouts and responsive design principles across the project.

Open Source Contributions

GirlScript Summer of Code (GSSoC) — *2026 · Present*

- Contributing to open-source ML/AI projects via Git · collaborating on version-controlled, production-oriented repositories with the global developer community.

Technical Skills

Languages: C++, Python, SQL
Libraries / Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn, Keras, TensorFlow, NLTK, SpaCy, FastAPI, OpenCV
Developer Tools: VS Code, Jupyter Notebook, Google Colab, Git, GitHub
Core Areas: Machine Learning, Deep Learning, NLP, Data Pipelines, Model Deployment, REST API Development

Achievements & Activities

- **EduForensics (FlowZint AI Hackathon 2026, Unstop):** Currently building a 3-module AI academic integrity platform · AI content detection via forensic fingerprinting, paraphrase assistant with AI-word replacement suggestions, and a subject-specific Q&A bot for engineering students.
- Participated in Amazon ML Challenge 2025 and multiple Kaggle ML competitions.
- Participated in MUX HACKZ 2.0 and Smart India Hackathon (SIH) for team-based problem solving.
- Completed 21 Days Coding Challenge by Coding Ninjas.
